

## ***Electric Oven Controls System***

*2 Ackerman Avenue, Clifton, NJ*

*Client – SAFAS Corporation*

Engineering investigation and documentation of the existing industrial electric oven controls system at SAFAS Corporation. The investigation included tracing of existing controls system wiring to properly document major controls equipment, such as dampers, blowers, power supplies, and sensors. A flow chart of the electric oven operation, including catalog cut sheets of controls system components and devices, recommendations and opinion of a probable cost were included in the final engineering report.
