

## ***Princeton Residence Engineering Investigation***

*4900 Province Line Road, Princeton, NJ*

*Client – Octagon Construction, 10 Jeanette Street, Carteret, NJ*

The project included review of various file materials and construction documents, including plans, sketches, calculations, punch lists and work authorizations/permits pertaining to a potential claim against the client with regard to alleged electrical, mechanical, plumbing, and structural deficiencies in the construction of the cabana structure and the garage addition at the above referenced site. The report consisted of background information, observations and findings, review and discussion regarding various correspondence, engineering opinions regarding the electrical, mechanical, plumbing, and structural systems that were installed by the client at the above site.
